

DMR Access - log on using your generic DHHS log on & password

DMR is accessed via PICIS (short cut button on tool bar) or from the favourites drop down menu on the internet of all RHH computers.

Navigating the DMR and finding what you need is most easily done by filtering the information.

- All tabs show all documents within that tab, EXCEPT for the Admission tab. This tab first displays a file for each admission. If you want to find all of a particular document (eg anaesthetic Intraoperative record) then an additional step is required (see below).
- For other tabs, all documents are already shown, so filtering can be done immediately.

Displaying items is best done using the drop down menu on the tab.
Eg Anaesthetic flow chart for diagnostic results.

Accessing 'e' forms is via the drop down menu on the tab
